Variance Acrylic Finish Systems

- A 100% Acrylic Polymer Based Finish System
- Interior & Exterior
- Limitless Customized Colors & Variety of Textures
- A Durable & Easily Applied Plaster Finish
- Ultimate Protection, Eliminates Moisture and Need for Sanding
- Training, Samples, Colors, Accessories
- Surprisingly Affordable
- Support & Consultations upon Request

NEOGARD Construction Coatings AUTO - GUARD

Auto-Gard Systems are designed to:

- Waterproof your new or existing parking structures
- Reduce maintenance costs associated with unprotected concrete
- Prolong the life of your parking structure
- Avoid costly rebar deterioration
- Protect concrete from leakage
- Prevent scaling and spalling
- Let's not forget how it beautifies your parking ramps

How does Auto - Guard work:

- It becomes a part of the parking structure
- It is liquid-applied to form a seamless protective barrier
- Approved aggregate embedded in the coating creates a durable skid - resistant surface
- Optimum tensile strength and elongation properties allow it to expand and contract with freeze / thaw conditions while bridging hairline cracks up to 1/16"
